Professional Summary

AI engineer with 8+ years building machine learning and LLM-based products from business problem definition through production delivery. Recent work has focused on LLM-assisted decision systems, structured extraction, and analyst-facing applications built with Python backends, React frontends, and workflow orchestration. Comfortable working hands-on across product scoping, prompt design, backend services, UI delivery, and cloud deployment in client-facing environments.

Core Capabilities

- LLM application development, prompt design, and retrieval-oriented workflows
- Python backend development with FastAPI, Pydantic, SQL, Pandas, and NumPy
- Full-stack delivery with React, TypeScript, and operator-facing dashboards
- Production orchestration with Prefect, serverless deployment patterns, and cloud-based data workflows
- Prior delivery experience across Azure, Databricks, AWS, and GCP environments

Professional Experience

controlthrive

Founder & Principal AI Engineer

April 2023 - Present

Remote

- Build AI products end to end for clients, from discovery and solution design to implementation, deployment, and iteration.
- Built an AI-assisted investor-matching platform for MVV Capital Partners that turns deal materials and CRM history into ranked investor shortlists with explainable reasoning. Delivered the product across a Vercel-based frontend, Prefect orchestration, S3 ingest, and Python services that combine deterministic scoring with LLM-based notes analysis.
- Built an earnings-call intelligence product with a FastAPI backend and React dashboard to process transcript and audio signals across 500+ portfolio companies, helping research teams monitor sentiment and key events more efficiently.
- Developed LLM-based internal tools and client products across structured document extraction, matching, and RAG-style workflows, including a chatbot application built with Metaflow, OpenAI, FastAPI, and JavaScript frontend components.
- Built a dynamic pricing system that increased revenue by 35% and sales by 25%.

Fintonic

Senior Machine Learning Engineer | Lending

October 2022 - February 2023

Barcelona, Spain

- Improved lending and fraud workflows in collaboration with Product, UX, and Risk teams.
- Streamlined model deployment and backend data services using FastAPI, MongoDB, Kubernetes, and AWS/SageMaker.

KPMG

Customer-Facing Data Scientist

June 2022 - October 2022

Barcelona, Spain

- Led client-facing data science work, translating business problems into practical analytics and machine learning solutions.
- Delivered Azure-based recommender work and other ML initiatives in enterprise environments.

Previous Experience

Senior Data Scientist | Product, Minsait

Data Scientist | Consulting, PwC

Data Analyst, Orange

- Earlier roles focused on analytics, machine learning delivery, and stakeholder-facing problem solving across consulting and enterprise settings.

Education

Master's Degree in Data Science
Universidad de Zaragoza
